

# Invenio IBP Core90

## Losing revenue due to slow or cumbersome business planning?

As an SAP Gold Partner, we designed our IBP Core90 package to help businesses overcome planning challenges and build highly resilient digital planning capabilities for the future. With our extensive experience in delivering supply chain projects our experts have developed a fixed price, fixed scope and fixed timeline package – which provides clients with value from investment within 90 days.

### Why is this important for my business now?

Digitalisation and unprecedented changes are presenting a new set of planning and demand sensing challenges, such as:

- Volatile demand due to increasing pressures.
- Extended and distributed supply networks.
- Lack of ability to simulate the impact of decisions.
- Natural calamities (as we've seen with COVID-19).

Businesses need to be prepared, with the ability to continue planning plan through disruptions and uncertainties. Some organisations are simply not reacting; they **WAIT** to see if things return to normal. Others **REACT** indiscriminately to the changes in demand, without really understanding or adapting to the situation.

To thrive, organisations need to understand what's happening to their business, sense the changes required, and recognise the impact on planning needs to establish an effective **RESPONSE**.

**Invenio IBP Core90 enables businesses to be...**

### More strategic

Suggest how I can accelerate revenue and reduce working capital

### More productive

Advise me to make profitable decisions

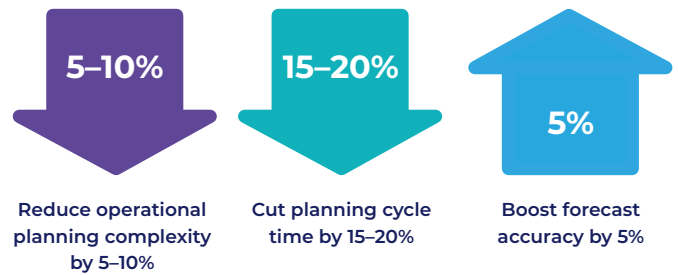

### More responsive

Help me leverage strategic business opportunities

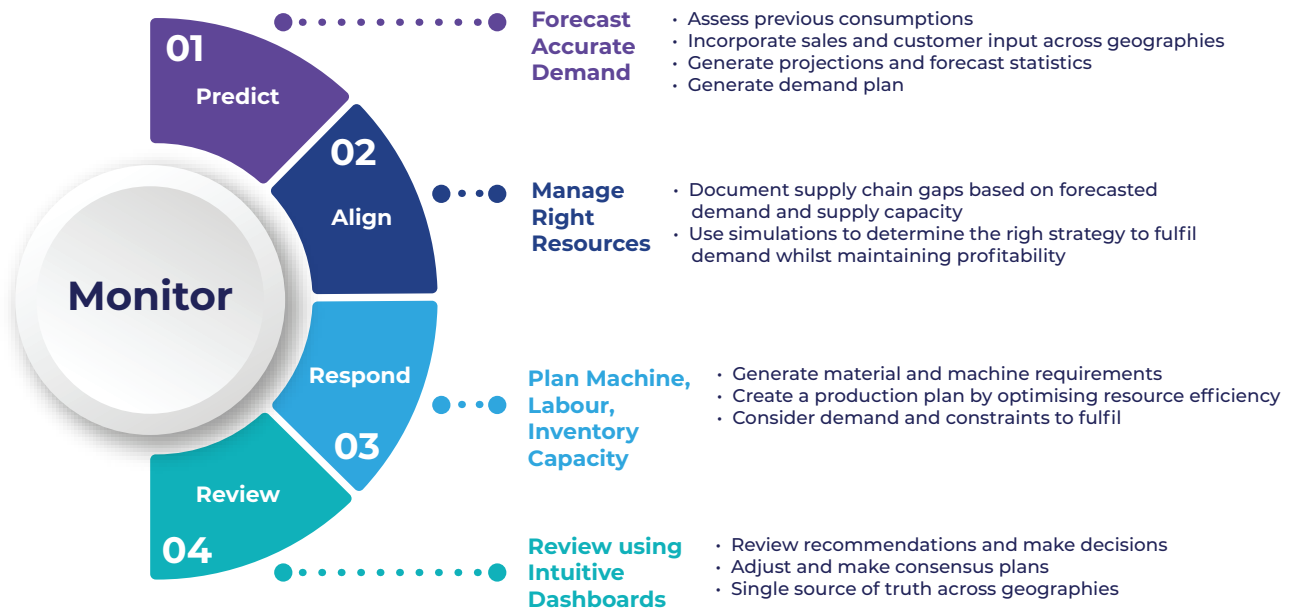

## Looking to protect your business's future?

You need to create a resilient, technology-based and data driven planning process. One that can face these challenges head on. A resilient planning process provides accurate and timely data, end-to-end visibility across functions, and enables your business to make better decisions in real-time.

### Invenio IBP Core90 helps your business to:

### The Invenio IBP Core90 four steps to achieving a highly resilient planning cycle:

### How Invenio IBP Core90 equips your business with key capabilities:

- Identify and launch a set of easy to position and sell products.
- Drum up demand using virtual / consumer-type lead generation.
- Multiply through a network of engaged partners to sell, service and expand.
- Enable high volume and high velocity deals by introducing simplified and flexible pricing contracts.
- Review and measure success to ensure customer success and continuous improvement.

## Start your 90-day journey today!
